[01] // About Me

Software Engineering student and Junior Developer with production experience building full-stack AI-powered services, web apps, and automation tools. Shipped a production monorepo (web app, Chrome extension, Supabase backend) as the sole developer. Hands-on with Python, TypeScript, React, REST APIs, LLM integrations, and agentic workflows. Comfortable with Linux/VPS, CI/CD, and technical documentation.

[02] // Technical Skills

Programming Languages: TypeScript, Python, SQL, C#, JavaScript, HTML/CSS

AI & Agentic Systems: Agentic AI Development, Model Context Protocol (MCP), Claude Code, LLM Integration, RAG, Prompt Engineering, LangChain, AST Analysis

Backend & Cloud: Supabase, PostgreSQL, Row-Level Security (RLS), OAuth 2.1, REST APIs, Stripe Billing, Resend, VPS (Linux)

Tools & Practices: Git, CI/CD, PyCharm, Visual Studio, pytest, Jupyter Notebook, OOP, SDLC, Agile

[03] // Experience

Grenergy LLC Jun 2026 – Aug 2026 (3 mos)

AI Agent Developer Intern *Hybrid, Istanbul*

- Built and maintained backend and platform components for a production AI product across web, Chrome extension, and Supabase services.
- Designed and implemented OAuth 2.1 authorization flows in TypeScript for secure MCP connector and API integrations.
- Designed a multi-tenant PostgreSQL/Supabase data model with Row-Level Security policies for secure customer-data isolation.
- Built REST API clients and integrations for OpenRouter, Stripe, and Resend; handled authentication, error handling, and service communication.
- Maintained CI/CD deployment workflows and Linux VPS infrastructure, supporting reliable delivery of product features.
- Worked with LLM-based workflows and agentic integrations to deliver AI-powered product capabilities.

[04] // Projects

Unitra | *Python • Flask • pywebview • HTML/CSS/JS • LLM APIs • pytest*

- AI-powered desktop application that automatically generates Python unit tests from source code.
- Built an AST-based analysis engine to extract function signatures, docstrings, and type hints for structured prompt construction.
- Designed the LLM integration layer with prompt engineering to produce syntactically valid, runnable pytest test cases.
- Packaged as a desktop app using pywebview with a Flask backend and a custom HTML/CSS/JS frontend.

PyGlow | *Python • PySide6 • Pygments • Local LLM*

- Lightweight Python code editor built from scratch with syntax highlighting (Pygments), search/replace, auto-indent, and multiple themes.
- Integrated optional local LLM-based code autocomplete triggered inline while editing.
- Designed a modular plugin-style architecture with persistent user settings across sessions.

Applied Data Science | *Python • pandas • seaborn • Jupyter Notebook*

- Conducted exploratory data analysis on real estate pricing, retail sales, and student performance datasets.
- Cleaned and transformed raw datasets; built visualizations to surface key trends and correlations.
- Delivered structured Jupyter Notebook reports with reproducible analysis and documented findings.

[05] // Education

Varna University of Management Sep 2025 – Present
BSc Software Engineering *Varna, Bulgaria*

- **Relevant Coursework:** Object-Oriented Programming, Data Structures & Algorithms, Software Design, SDLC, Agile

[06] // Certifications

Vanderbilt University | *AI Agents with Model Context Protocol Specialization* View Certificate Sep 2026
Vanderbilt University | *Generative AI Software Engineering Specialization* View Certificate Sep 2026
Sooezy Academy | *Agentic AI Sooezy - Season 1* View Certificate Aug 2026
IBM | *Fundamentals of AI Agents Using RAG and LangChain* View Certificate Mar 2026
IBM | *Python for Data Science, AI & Development* View Badge Feb 2026
